

David Torres López

Murcia, Spain • [linkedin.com/in/david-torres-lópez](https://www.linkedin.com/in/david-torres-lópez) • davto.xyz@gmail.com • davto.xyz

Full-Stack Developer with more than 5 years of experience in web application development, software architecture and systems integration. Specialised in backend and frontend, with experience in designing and consuming REST APIs, business logic, relational databases and user interface development.

Experienced in data analysis and Business Intelligence (BI), including writing complex SQL queries, integrating data across systems, automating processes and producing reports to support decision-making.

Familiar with agile methodologies and development best practices, prioritising the performance, maintainability and scalability of the solutions delivered.

PROFESSIONAL EXPERIENCE

Freelance

Murcia, Spain

Full Stack Developer · Frontend Developer

March 2025 – Present

- Built complete web platforms with React, Astro and TypeScript for clients across a range of sectors, from concept through to deployment.
- Developed bespoke management systems and SPAs, including dynamic filtering and content management.
- Designed and implemented responsive interfaces with Tailwind CSS.
- Optimised SEO and web performance, improving the visibility and loading times of the projects.
- Integrated WhatsApp and other direct contact channels into client acquisition flows.
- Maintained and provided technical support for projects in production.

Xtart FP

Murcia, Spain

Full Stack Developer · Data Analyst

May 2019 – February 2025

- Developed and deployed middleware for internal systems integration, reducing manual intervention in key processes.
- Designed and maintained MySQL and SQL Server databases, covering data modelling, query optimisation and performance management.
- Built complete web platforms with Laravel, JavaScript and SQL Server, from the backend through to the user interface.
- Implemented complex queries and data pipelines for Business Intelligence, serving as the data source for corporate reporting.
- Integrated external APIs and REST services into company workflows, automating processes and improving operational efficiency.
- Developed and administered Moodle training platforms tailored to business needs.

Openred Soluciones

Murcia, Spain
